Hi Randy,

I have draft previews (stills) of four of the options that I'd like to get our feedback on before I fully animate them. Here is a link to preview. I provided two options for School Closure – let me know if you have a preference between the two.

For the Relocate Focus Programs option – should this show something like an art program or science program that is being moved to one school from another? I'm not quite sure how this one needs to be visualized.

Thank you!
