Some of the questions for session 2 I see posted in there below:

- How will closing schools "down the hill" impact the mountain schools? We know it will, please honestly address this.
- When considering budget cuts, will there be a proportional reduction across both classroom funding and district-level administration, or will there be a focused effort to preserve classroom resources and reduce district-level expenses?
- What is BVSD's District Admin doing to manage Open Enrollment to benefit the educational experience and equity for ALL students and faculty?
- Elementary numbers are lower, yes, but middle levels showed a staggering decrease in enrollment as well. The trajectory is clear, so why are we only addressing Elementary consolidation, etc.?
- When schools are closed due to consolidation, what will happen to the real estate? Will it be sold or developed? Are there any plans to build affordable housing for BVSD teachers and staff?
- How does the district plan to support critically important bilingual education ?
