Awesome, thanks Randy for the feedback and notes. I'll start working on the animations based on your notes.

This is outstanding. I think the look and feel are right. I'll just provide a few notes, but you are on the right track!

- I think the school, icons and look are perfect

Introduce or expand focus programs

- For animation, I would have the circular icons show up (-- all three with the little light blue dots) above the school (with dark blue kids outside) like they are without the lines. Then, fade in the plus in place of the circle dot... the dotted line goes down and connects to it. The other two fade out... and the more light blue colored kids appear amongst the kids walking into the school.

Relocate focus programs

- I would start with the finished graphic from above (except a blue dot -- no plus yet)... and then have another school appear -- the dotted line evaporates... the circle transitions right to the other school ... and then green plus is added and it attaches to the new school, similar to what happened in the above graphic.

Grade reconfiguration, e.g. K-2 & 3-5 or convert K-8s to elementary and middle

- Start with those two schools at top... with the different colored kids grouped around each school separately.
- Kids come together like they are now, but lower on screen (kind of like they walked to a place together...
- Now K-2 and 3-5 circles appear behind original schools -- and sorted kids go to the school matching their color.
- Then, swap out the K-2 for Elementary and 3-5 for Middle. Maybe the schools plump up to.. because they are K-8s instead of K-5s?

Consolidate two or more schools into one building (existing or new)

- I'm thinking we show two schools left and right
- Each school has kids of one of the colors of blue.
- Kids from the school on the right come and gather with the kids on the left and are all mixed by the end and maybe even turn to a third color of blue?
- Right school fades away.

Close one or more schools and distribute students to multiple schools

- I definitely like the closure version with the closing school above the other three.
- I'd make it the same size
- Obviously, we'd have kids move some how down

Hi Randy,

I have draft previews (stills) of four of the options that I'd like to get our feedback on before I fully animate them. Here is a link to preview. I provided two options for School Closure – let me know if you have a preference between the two.

For the Relocate Focus Programs option – should this show something like an art program or science program that is being moved to one school from another? I'm not quite sure how this one needs to be visualized.

Thank you!
