Hey Randy,

Thanks for these comments and the feedback. I can't remember the order of events now between your sharing of the ChatGPT summary and my running this through NotebookLM. I'll do some more work to improve this and/or we can just use the ChatGPT summary and be done with it. I'm working from home today but can connect on Google Meet. I also have time Tuesday if that's better for you. Just let me know.

Thanks,
Jessica

Overall Rundown (Across All Schools)

What staff are most concerned about (consistent across sites)

- **Class size is the dominant issue** – repeatedly tied to instructional quality, behavior, and student relationships
- **Loss of staff and supports** – especially special education, paraprofessionals, counselors, and interventionists
- **Loss of community and identity** – neighborhood schools, PK–8 models, and focus programs (IB, dual language, arts integration)
- **Job security and staff displacement** – particularly for newer teachers and specialists
- **Equity concerns** – how resources, high-need students, and programs are distributed across schools
- **Process concerns** – transparency, timing, and whether decisions are already made
- **Family impact** – logistics, transportation, and risk of families leaving the district

What educators say makes teaching effective

- **Strong relationships** with students and families
- **Collaboration** within stable, cohesive teams
- **Small class sizes and manageable caseloads**
- **Access to support staff** (SPED, paras, counselors, specialists)
- **Clear school identity or model** (IB, dual language, PK–8, arts integration, Core Knowledge)
- **Supportive leadership and positive culture**
- **Experience with diverse and high-need learners**

Most requested supports (remarkably consistent)

- Smaller class sizes (often explicitly below contractual caps)
- More **special education, paraprofessional, and intervention support**
- Full-time **counselors, specialists, and mental health staff**
- More equitable and predictable **FTE allocation**
- Protected **planning and collaboration time**
- Clear, early, and transparent **communication and staffing pathways**

Key tensions emerging across the system

- **Efficiency vs. community** → consolidation benefits vs. loss of identity
- **Equity vs. equality** → directing resources where need is greatest vs. preserving all schools
- **Specialized programs vs. standardization** → protecting IB, dual language, arts, PK–8
- **Short-term disruption vs. long-term sustainability**
- **Central office vs. school-based investment** (raised in multiple locations)

Big takeaway

Across schools, staff are not resisting change outright—they are asking for **conditions that make teaching and learning viable**: manageable class sizes, adequate staffing, and preservation of the elements that already work.

- **Concerns:** Traveling specialists
- **Strengths:** Specialized instruction
- **Wants:** Single-site assignments, shared planning
- **Watchpoint:** Specialist workload

Meadowlark

- **Concerns:** Overcrowding, inequitable enrollment distribution
- **Strengths:** Data-driven systems, counseling model
- **Wants:** More FTE, space, equitable distribution
- **Watchpoint:** Resource imbalance

Emerald

- **Concerns:** Class size without added support
- **Strengths:** SPED and early childhood expertise
- **Wants:** Weighted staffing, more SPED support
- **Watchpoint:** Resource alignment with enrollment

Bottom Line (1–2 sentence version you can use anywhere)

Across the district, staff consistently point to class size, staffing levels, and preservation of strong school communities and programs as the core conditions for success. While there is openness to change, the message is clear: **any solution must protect instructional quality, equity, and the relationships that make schools work.**

Jessica Alzen (jessica.alzen@bvsd.org) has invited you to edit the following document:

Hi Randy,

This is an executive summary of the analysis with the Round Table data. As someone who read through all of that data, please review and let me know if it seems to adequately reflect what you read. I also read all of the data and include this double human check of AI work as part of the methods for generating this document, so it would be great if you can get to it. No rush though.

Thank you,
Jessica
