Rob,

I've revised it slightly. Otherwise it looks good.

"We came to SBL with long-term operational challenges and a need to ensure all students had equal instructional time. They developed a plan that included a bell time study, which standardized school days and created opportunities for district-wide joint planning and professional development. On top of that, it was a cost-neutral plan that optimized our bus utilization."

Hi Rob,

I hope all is well.

Our company will be attending several ASBO shows soon, including those in California, Washington, Colorado, and Pennsylvania. We plan to share information with conference attendees regarding our services, specifically highlighting the work we did for BVSD.

Would you be willing to provide a quote or testimonial regarding our work with BVSD? I am happy to draft something for your review and approval if that would be easier.

Thank Rob
Rob
