Subject **{BVS Board} Website feedback on attendance boundaries**
To BVS Board <bvs.board@bvsd.org>
Cc Rob Anderson <rob.anderson@bvsd.org>
Date September 8, 2025 12:50:13 PM MDT

Dear Board Members,

Over the last week we have received a fair amount of feedback on our website regarding the proposed attendance boundary changes. I want to note that this feedback has largely come from the broader community, rather than those directly impacted by the proposed changes. While we are not able to include this information in the presentation itself, I plan to reference it in my talking points.

I felt it was important to share this feedback with you in advance of tomorrow's board meeting.

Thank you,

Rob

Rob Price
Assistant Superintendent of Operational Services

- Boundary Change Website Feedback Form Responses as of 09-07-2025.pdf

Email Address	What is your connection to Boulder Valley School District, e.g. parent of a student, BVSD staff, resident of an affected neighborhood, student potentially impacted by the changes, etc.	What feedback do you have about the proposed changes?
eschoeffler@gmail.com	Parent of students potentially affected	I am a parent of a student who goes to Crest View. The proposed plan will move about 30 kids out of our district to save Heatherwood. While on paper this seems like a good way to protect Heatherwood from closure, in practice it is bad for our community. My child's best friend lives in the area affected, so at worst this would separate the two of them. At best it causes their family undue harm by preventing them from using the bus to get to school. Talking to most families it sounds like the latter case is more likely and in that case, this measure does nothing to help Heatherwood and mostly just strips some of our community from having bus access - the part that needs it the most since they are far away. If the former case happens, that would also put Crest View very close to being under the 300 student enrollment goal. Crest View is expected to lose more students in the next few years due to larger class sizes in 4th and 5th grade than the younger grades. So it's very possible that doing this to save Heatherwood just puts Crest View at risk down the line. Please consider these negatives when voting on this proposal. Thank you for your time.
mark.christopher.duncan@gmail.(	Parent of a BVSD student	The south/east area of Superior Downtown is within the Monarch k-8 boundary, but is within walking/biking distance of Superior Elementary. Can this area be made into dual access to both Monarch k-8 and Superior Elementary please?
jliljeng@gmail.com	Parent/gaurdian of 3 students	Thanks for taking feedback. While there is no easy solution to some of the enrollment challenges that are facing BVSD right now, it doesn't appear that redrawing the boundaries as a standalone measure will help overall. In North Boulder, Heatherwood has a low enrollment but Crestview is only slightly better and balancing between the two seems to put both campuses at risk of falling below enrollment thresholds for full programming with two years. While heatherwood is already below 2 classes per grade, crestview is at two with all but the oldest grades and well below the building capacity.
mtrudgeon@comcast.net	Parent of a previous student	Crest View has always been one of the larger schools yet has such a small, lovely community feel. I worry if you take kids away from it, that we may lose too much of what is so good about it. I would NOT want to be caught in the neighborhoods affected by this potential change. I think people buy homes based on the schools they're zoned for and this is an unfair change to put on them. Making the change OPTIONAL is one way to handle it but going out and changing the boundary line seems really unfair.
bryce@hatchboulder.com	Parent	I am writing to provide feedback on moving the Crest View / Heatherwood boundary. This feels like a short-sighted adjustment that will take one at-risk school and make both Crest View and Heatherwood at-risk in future years. Please consider other solutions that can actually solve a smaller child-population and need for funding which do not seem like trends that will be going away!
maggie7774@gmail.com	Parent of elementary and middle school child and recent Boulder High Grad	With declining school enrollment across the board in BVSD, moving the boundaries in Gunbarrel does not make sense. Crest View is the largest physical elementary in BVSD. Closing down Heatherwood and bussing all of Gunbarrel to Crest view is more sustainable for the long term. Crest View can handle 4 classes per grade, as numbers decline consolidation has to occur. Either Foothills elementary or Heatherwood needs to be moved into Crest View.

Email Address	What is your connection to Boulder Valley School District, e.g. parent of a student, BVSD staff, resident of an affected neighborhood, student potentially impacted by the changes, etc.	What feedback do you have about the proposed changes?
elizard2001@gmail.com	Parent of Crest View Student	I am strongly opposed to reassigning Gunbarrel students to Heatherwood Elementary + Platt Middle School. My 4th grade son has become very good friends with several of the Crest View Elementary students affected by the redistricting proposal. This is their fifth year together at Crest View. They have playdates and play sports together. While my son does not live in a location directly affected by the redistricting proposal, he will also be directly, adversely affected by loss of community if this change goes through. Furthermore, the health of the Crest View Elementary community will also be adversely affected — this proposed change would drop Crest View very close to thresholds that will cause them to lose even more staffing and support. How is this change possibly fair to Crest View students? While the BVSD school board looks at these questions in terms of "numbers," the rest of us understand the decision in terms of real families, children, friendships and family schedules that are directly affected by the decision. How is it fair to ask a working family to choose between allowing their student to continue with friends (by open enrolling outside an arbitrarily drawn new school boundary) if it means they can't get to work on time because their children are no longer assigned a bus? For 40 years, Gunbarrel has been part of the Crest View Elementary and Centennial Middle School family and we do not want to lose them. Please reconsider this proposal.
mapylenbll@gmail.com	resident of affected neighborhood	Please do not change Crest View's boundaries. This has come up over the years. The majority of the people who you are moving have had the option to choice into Heatherwood and did not. They will choose to choice into CV. This will create discord int he community when some get in and some do not. CV is loosing enrollment as well. So you will be putting CV on the edge of becoming a lower enrollment school.
michellehessler89@gmail.com	Parent at Crest View	This change will negatively impact Crest View which is already seeing lowered enrollment. I understand Heatherwood is more at risk so this new boundary would help them but it seems that by taking away from Crest View it may just result in two schools hurting for enrollment.
megan.heinzmann@gmail.com	Parent of former student and resident of an affected neighborhood	I think the change makes sense and will help out even out student distributions - especially to a school that a lot of funding has gone to. Crest View has asked us to fight back against this, but doing so will not fix the overall greater issue with the school - which is that parents are not satisfied with the principal due to his vision and lack of leadership.
christina.m.dalby@gmail.com	Parent of student at CrestView	I feel this change will hurt CrestView and not help Heatherwood. If we lose the enrollment to Heatherwood, CrestView may dip below the 300 students/ school threshold. I would rather see all (or most) of Heatherwood attend CrestView and make that a vibrant school. With overall declining enrollment in BVSD, perhaps the solution is to close a few elementary schools which will then allow the open schools to be fully funded and provide full services to our kids.
bouldersmashcakes@gmail.com	Parent	My child is going into 5th grade at Crestview next year and it would be super disruptive to him. He could open enrol but he would lose the bus and all his friends are going to Centennial so then he'd open enrol at Centennial anyway. All the kids in the neighborhood will open enrol at the schools they used to be zoned to go to so it won't fix the problem for heatherwood anyway. Platt is not biking distance from our neighborhood and its way further away than Centennial. I do not support this change.

Email Address	What is your connection to Boulder Valley School District, e.g. parent of a student, BVSD staff, resident of an affected neighborhood, student potentially impacted by the changes, etc.	What feedback do you have about the proposed changes?
jenniferhdearth@gmail.com	Parent of a student that attends Crest View	I'm very concerned about the proposed boundary change that would move more than 30 children to another school. Our elementary school (Crest View) already struggles with low enrollment, and removing this many students would make it even harder to maintain programs and staff. This change would also take my son away from his close friends and para teachers who play a vital role in his daily support and learning. The disruption to these relationships and the school community would be significant. I strongly urge you to reconsider this proposal and look for solutions that support, rather than weaken, our school.
sara.scheer@googlemail.com	Parent	Absolutely not a fan. Crest view is an amazing school and we would be very upset if this would not be our neighborhood school anymore
carolynphil@gmail.com	Parent of 3 kiddos in the affected neighborhood	We recently moved from west of 119 to east of 119 and it seemed logical to switch all three (4th, 3rd and K) from Crest View to Heatherwood. We did this knowing the boundaries were in question but regardless, It is my belief that your neighborhood school should be the school that is closest to your home, for us zoned Crest View, Heatherwood is 2miles closer. The diagonal is a natural boundary line with Heatherwood being closer than Crest View for homes on the east side. The considered area doesn't necessarily have good biking routes for either school but wouldn't even consider crossing the highway on bike to Crest View, maybe once construction/underpass is completed but still need to contend with Jay to get there. Lastly, there are 5 elementary schools within 4 miles of each other, 4 schools within 2miles. I know this a denser population but Heatherwood services an area where the next closest public school would be over 5 miles away which adds to the argument of increasing enrollment by adjusting the boundary. I can sympathize with Crest View not wanting to lose anymore students to a boundary change, but there might be more Crest View needs to consider other than rezoning if only 32 of 54 Crest View zoned students in the proposed boundary are going to Crest View.
jeni.berngard@gmail.com	Parent of crest view students	I disagree with the boundary changes. Although I feel for Heatherwood's situation, redrawing this boundary line will not solve Heatherwood's challenges in the long term and only creates the same potential problem for my children's school (crest view) that is already in its own decline in enrollment. I have a 5th and 3rd grader and a rising kinder next year and we strongly believe in enrolling in our local public school. Crest view has been a wonderful place for our kids, but we are also feeling the squeeze of attrition ourselves. Typically with reasonable class size, my son's 3rd grade already lost 11 students this past year forcing it to change from 3 to 2 classes and losing long time teachers. We have lost our full time librarian role and others vital roles are in jeopardy. This new boundary change feels highly unbalanced toward Heatherwood and does not solve the larger problem for BVSD which is that sadly we may have too many facilities. We strongly oppose this boundary change and are disheartened that this is a proposed solution. It does not face the larger problem and only hurts our local Crest View school.

Email Address	What is your connection to Boulder Valley School District, e.g. parent of a student, BVSD staff, resident of an affected neighborhood, student potentially impacted by the changes, etc.	What feedback do you have about the proposed changes?
milliemarshall11@gmail.com	Crest View parent	I'm very concerned that Crest View is more vulnerable than it appears to the district and I believe this boundary change will produce two struggling schools. I'd love to see the district really scrutinize what will happen to Crest View with 10% of their students gone. The LRAC predicted Crest View's enrollment would be 362 this year but it is only 336. This year, Crest View's librarian was reduced from full time to 50% because of declining enrollment and 43% of our school's population is in 4th and 5th grade which means we are facing another steep decline and possibly losing our specials teachers. I feel bad for Heatherwood, but it seems like it makes more sense to convert Heatherwood into a High Peaks or Horizons style school that can draw North Boulder students back into the public school system. Furthermore, only families that live in Gunbarrel were contacted about this change and the wider Crest View community just found out, which is frustrating and doesn't foster good will toward the district.
chris.angelovic@gmail.com	Parent of 2 students, resident and alumni of Crest View, Centennial & Boulder High School	We are firmly against the proposed boundary line changes. The boundaries have been in existence for 40 years. Neither Heatherwood or Platt are safely bikeable. Platt Middle School is nearly twice as far from Centennial and in a very different part of town which will give our current students no continuity with their classmates.
mx.jdertinger@gmail.com	Parent of students, student potentially impacted by changes	Redrawing boundaries for north Boulder and Gunbarrel would force my children, who have only just begun at Crest View and Centennial, to change schools right when they've begun to feel comfortable in their new environment. Additionally, these proposed redrawn boundaries would jeopardize Crest View Elementary funding and still not impact Heatherwood significantly enough due to school choice, charter schools, and open enrollment. Redrawn boundaries would also further marginalize students in these areas by ending their guaranteed busing if they were to open enroll at Crest View or Centennial. Serving our students means operating in an equitable manner, which includes equitable access to transportation. Offering some students guaranteed busing while denying it to others is most certainly not equitable treatment. The proposed changes would also jeopardize our teachers and other staff, putting them at risk of being laid off or dropped to part time, a strategy we have seen fail time and time again across the nation. Rezoning school boundaries can be effective when a school with significantly higher enrollment rates than Crest View's, but removing roughly 10% of students from their neighborhood school would barely address the enrollment deficit at Heatherwood at best. There is also the likely outcome that due to school choice, parents with students who feel at home at Crest View would likely open enrollment their students at Crest View anyway, causing the potential solution to backfire, affect student success and attendance due to loss of guaranteed busing, and still not address the enrollment deficit being faced by Heatherwood. Though we would like to see Heatherwood's enrollment rates increase, this proposal does not solve the issue and has a host of potentially disastrous effects on yet another school in our nation. A more effective solution would be to address the issue of charter schools impacting public school enrollment and funding.
rachelsjoyce@gmail.com	Parent	I believe the existing boundary serves Crest View community is creating a diverse, culturally responsive school that is special in the Boulder area. I want to see this community thrive as it is unique in this area. All students are welcome, diversity is celebrated and different cultural backgrounds celebrated. Changing the boundary will jeopardize the future of a Crest View and while I don't know the facts and figures, this change seems to be in an effort to save a another school. This seems a risky strategy.

Email Address	What is your connection to Boulder Valley School District, e.g. parent of a student, BVSD staff, resident of an affected neighborhood, student potentially impacted by the changes, etc.	What feedback do you have about the proposed changes?
brookehaimeshill@gmail.com	Parent of a student	I am concerned that the boundary shift will negatively affect the Crest View Elementary school funding formula, putting us dangerously close to the 300 students per school threshold.
rachelweinbergrealtor@gmail.com	Parent of two BVSD students, one whom graduated Crest View Elementary after 6 years of attendance and is currently a 7th grader at Centennial Middle School and one that is currently a 4th grader at Crest View Elementary School. We also live within the bouldaries of these schools and so these choices and changes effect our property value and lives.	It has come to our attention that BVSD will be voting on changing the boundaries of Crest View Elementary school and we hope that the board will vote AGAINST the change and keep the current and LONG-STANDING boundaries of our cherished neighborhood elementary school. The boundaries have been in existence for 40 years. Crest View and Centennial have always been our neighborhood schools and our community. We give back to the students and are heavily involved on a volunteer basis. Neither Heatherwood or Platt are safely bikeable from Orchard Creek, i am not sure how the board believes this but Jay Road is deadline, especially the intersection at Jay and 63rd where mulitple accidents have occured. Platt Middle School is nearly twice as far from Centennial and in a very different part of town which will give our current students no continuity with their classmates. Our childen, some of them for 5+ years, would not just be yanked from their current community of friends and teachers, but would still not join up with them for middle school, forcing students and families to endure unnecessary hardship at a time when it is already difficult for students to thrive. Crest View already struggles annually with funding and this decrease of students will only further harm CVE funding. Many families that can afford private school have chosen to keep their kids in this neighborhood school to support the school and community. With even further funding issues, it is highly likely many of these afflent families would remove their students from BVSD all togther, even further harming funding. Quote from a neighbor, "It's one thing for parents to make the decision to switch their kids to another school. It's another thing to be forced to switch schools and BVSD wants to switch our neighborhood from high enrollment schools with funding to provide more services as well as long-term stability to two struggling schools with an uncertain future." PLEASE VOTE NO ON THE PROPOSED BOUNDARY CHANGE FOR CREST VIEW ELEMENTARY!!! A very concerned parent, Rachel Weinberg 5444 Westridge Drive, Boulder 303.906.1392

Email Address	What is your connection to Boulder Valley School District, e.g. parent of a student, BVSD staff, resident of an affected neighborhood, student potentially impacted by the changes, etc.	What feedback do you have about the proposed changes?
clsimon@gmail.com	Parent at Crest View	I'm very concerned that forcing students to switch from Crest View to Heatherwood will be incredibly disruptive both to those individual families and to the broader community, while not actually achieving any long term goals of healthy schools. Changing schools in the middle of elementary is incredibly hard for students and families. They lose their communities, friends and support systems. The families left behind will also lose very valuable members of the community and friends. To make this change you minimally need to enable all current students to finish out their full elementary career at their current school, including with bus service. Beyond the impact to families, I do not think this change actually adds value to the district. The student population is a zero sum game. Moving kids form Crest View to Heatherwood will just cause us to have two schools with borderline low enrollment rather than one. Crest View already has only 2 classes per grade in most grades, and lost full time library support this year. Pushing it smaller will have significant negative impacts on all students at the school. Additionally there is a large risk that families forced to switch schools will chose to move to private schools instead, a net loss for BVSD as a whole. The board must identify other solutions to increase enrollment at Heatherwood, e.g. by creating excellent programs that attracts kids to the school.
holmance@gmail.com	Parent of a centennial middle schooler and crest view elementary student	I am strongly opposed to the proposed boundary shift. Crest View is already at a fragile enrollment level, and removing these homes could push us dangerously close to sub-300 students. Families in these neighborhoods have been part of CVE for over 30 years and bring a deep sense of love and community to our school. Forcing them to Heatherwood would tear apart that belonging and further endanger our funding. As one of Boulder's most diverse schools, undermining Crest View in this way would be a huge mistake.
madisonabrower@gmail.com	Parent of 4 students, BVSD staff	Please don't take away Broadway dual attendance area. We have many students who are currently part of our Creekside community who would be impacted.
torinoelle@gmail.com	Parent of students, resident of an affected neighborhood	Moving this group of children from Creekside over to Bear Creek will uproot children and impact the stability and friendships formed. It's should be considered that the Highland Park parents who chose Creekside years ago are having that choice taken away, and should be treated at least equally to Open Enrollment families (who are guaranteed to stay at their chosen elementary school until middle school once they matriculate). Uprooting a child from a school should never be a forced outcome. There should be the option to stay at the school they are currently attending for those already enrolled. This will also affect Creekside's funding and the percentage of time students get with support staff members, like the counselor in the future which is very unfortunate for all students and should also be sensitively considered when voting on this decision.

Email Address	What is your connection to Boulder Valley School District, e.g. parent of a student, BVSD staff, resident of an affected neighborhood, student potentially impacted by the changes, etc.	What feedback do you have about the proposed changes?
heatherhauswirth@gmail.com	Parent of a student	I am the parent of a 3rd grader at Creekside. And while my family and I are not directly impacted by the boundary change, we have several friends who will be. Since Creekside has a disproportionately large student body and larger class sizes compared to other neighborhood schools (ex., Mesa and Bear Creek), redrawing boundaries might make sense to redistribute the student body more equally amongst neighboring elementary schools. However, any boundary changes should impact incoming preschool and kindergarten children, not those that have been attending any given school for more than a year. It seems unfair not to mention disruptive to ask children and their families to change schools in the middle of their tenure. Please give students and the families impacted by these boundary changes the chance to remain at the school they've been attending should they so choose.
nikkiegenolf@gmail.com	parent of student at Creekside	I'm all for the changes in boundary lines to make the school enrollment more equitable but to make sure that you don't have negative impacts on the current students, the change should be rolled out only for new/incoming K students and given as optional for older students. This would allow for a more natural change and evening of the enrollment as well as resources. Creekside would be drastically impacted by the students leaving along with their allocated resources by the district. Elementary is a very formative time for building friendship and confidence and many of the impacted students have build great friendships at Creekside over the past 2-4 years. My son's best friend would be forced to go to Bear Creek next year (for 4th grade) after they've spent the last 3 years becoming best buddies.
kiddo75@gmail.com	Parent of a student	Balancing enrollment is a laudable goal, but shifting this group of kids to new schools doesn't fix the problem; it simply puts a band-aid on BVSD's major issue, which is keeping families within their school district and at their local schools. Instead of shifting students and families around and inserting your challenges into our community, BVSD should be asking the tough questions – like why families in the Heatherwood or Platt areas aren't going there, or how BVSD can attract families to back to the district. Will BVSD just resort to constantly shifting students around every time this issue presents itself? That is clearly an untenable answer to this problem. Our community has been built around our current schools and the friends of our children. Removing them from the only scholastic experience they have known only tears them away from community, it doesn't build it. BVSD's proposed actions will cause anxiety and turmoil for our kids and alienate yet another group of families from BVSD. Middle school is hard enough; we don't need to add further change on top of an already tumultuous time. I ask the board to reject this proposal on behalf of the affected kids and families.
cristina.boulder@gmail.com	Parent of two students at Creekside	Forcing Creekside families to move after years of investing in this community is unfair and unnecessary. Kids are settled here, they know their teachers, their friends, and their routines. Pulling them out now risks real emotional and academic harm. Instead of uprooting kids, the district should find a way to phase changes in gradually so children's stability isn't sacrificed for an enrollment fix.

Email Address	What is your connection to Boulder Valley School District, e.g. parent of a student, BVSD staff, resident of an affected neighborhood, student potentially impacted by the changes, etc.	What feedback do you have about the proposed changes?
julie.anne.simmons@gmail.com	parent of a student	Forcing existing Creekside families to move their children to Bear Creek after they have spent several years building ties at Creekside Elementary is deeply unfair. These families intentionally chose Creekside years ago and could not have predicted that they would be forced to put their children through an abrupt and unnecessary transition like this through no fault of their own. At a minimum, they should receive the same guarantee of continuity as School Choice families. Telling parents that they can try to open enroll back into the school they have spent years attending and supporting is a cruel joke when the district could offer them certainty by implementing a plan that phases these changes in for incoming children and families rather than putting the burden on children to bear the consequences of the district's poor planning.The harm to children's well-being cannot be dismissed. Research consistently shows that school transitions during late elementary years can result in academic setbacks, behavioral challenges, and emotional stress. A study by the National Education Policy Center found that students forced to switch schools experience a measurable decline in achievement, particularly in reading and math, and often need more than a year to recover socially and academically. Creekside students are thriving where they are—why put them at risk of trauma and learning disruption for an enrollment adjustment that could be managed more gradually? And we should not forget the impact on children who will not change schools but will lose friends and classmates with whom they have spent years building strong bonds of friendship.Finally, this proposal raises concerns about resource fairness. Creekside is a strong, vibrant community that families have supported through years of engagement, fundraising, and volunteering. Stripping students—and therefore funding—from a healthy school in order to bolster under-enrolled school like Bear Creek is not equitable. Instead of weakening a successful school to compensate for low enrollment elsewhere, the district should consider long-term solutions: phasing changes in for incoming kindergarteners, investing in programs that attract families to under-enrolled schools, or even consolidating campuses where necessary. Shifting children mid-elementary to solve an administrative challenge is short-sighted. The school board should put the needs of children first and adjust this plan to avoid major disruption to students' lives.
jessfishy@gmail.com	Parent of at student at Creekside	Forcing existing Creekside families to move their 3rd grade children is unnecessary and unfair. Those who chose Creekside many years ago should be treated - at very least - the same as School Choice families and guaranteed to stay at the same school. They chose to attend Creekside for a reason, and it's unfair to force them to move mid-way through elementary school. Offering them an "opportunity" to open enroll in order to stay in their existing school is not only risky but loathsome. Many children, my son in particular, feels awful about potentially losing his closest and long time friends. Uprooting perfectly happy children mid-elementary school to balance other schools' poor enrollment is ludicrous. It's harsh and strong-handed, not to mention traumatizing to children. Honestly, this sounds like a result of poor planning, if this change simply cannot wait until children have finished the 5th grade. Happy children should not have to suffer from someone else's mistakes. You should strongly consider an alternative, and possibly more appropriate way to remedy two poor enrollment schools - and revisit the consolidation of them (Mesa and Beer Creek).
annembrainard@gmail.com	Parent	School attendance area boundaries should only affect future students. Do not rip students out of schools they have attended for years, where they have established connections with the school, teachers, and friends. Currently-enrolled students need to be grandfathered in. Otherwise, this would represent a huge disruption to the very students this district purports to support.

Email Address	What is your connection to Boulder Valley School District, e.g. parent of a student, BVSD staff, resident of an affected neighborhood, student potentially impacted by the changes, etc.	What feedback do you have about the proposed changes?
khiggsdonohue@gmail.com	Parent of a student at Creekside who has 4 friends affected by the change	I believe asking these affected Creekside families to move their 3rd grade children for 5th grade (as I understand they are grandfathered in for 4th grade) is divisive and unnecessary. These families who chose Creekside years ago should be guaranteed to stay there until middle school, and should be treated like School Choice families (guaranteed to stay at the same school). My child is worried she will lose 3 of her very close friends. Uprooting happy children mid-elementary school and taking away the bus route from working parents because other schools need more students seems harsh and unfair.
klksanford@gmail.com	I am a parent of 2 children in BVSD	It seems like part of a larger plan to annex Gunbarrel from Boulder. It also feels like a budgeting issue to get rid of the buses which has been a long standing theme we've dealt with since pre-covid. Moving kids to Platte which is twice as far as Centennial does nothing to bring the community together. BVSD needs to close some elementary schools, Heatherwood being one of them, and get Crest View back near capacity.
ariadnni@gmail.com	Parent of Student	We live in the Celestial Seasonings area off of Spine and are districted to Crest View. We went through the lottery to go to Heatherwood instead. The construction on 63rd notwithstanding, it felt insane to have to go all the way out across the Diagonal and up Jay to north Boulder to get to elementary school with Heatherwood so close. We like to ride our bikes home from school on nice days, and there's no way we could do that having to cross a major highway. This neighborhood is clearly part of the greater Heatherwood community.
mitchell.swenning@outlook.com	Parent	The proposed changes to include the Gunbarrel area west of 63rd to be zoned for Heatherwood is great for our Family! It gives us an opportunity to cycle to Heathwood on a much safer route, and overall much closer to our residence.
jasminesdiaz@gmail.com	Parent	I think consideration for those already enrolled in a school outside the new boundary should be given and only impose the newly established boundaries to new enrollees and incoming pre-k and kinders.
jhrogers01@bvsd.org	Student and Resident of Neighboorhood	I think it would impact many kids and might not be the best descision at this time.
ashleykempton22@gmail.com	Parent	I do not believe that changing neighborhood lines is going to help much if BVSD continues to allow open enrollment at such high numbers. Bear Creek has 31 kids in each of its third grade classes and so many of the students are not neighborhood students. The line change for Creekside versus Bear Creek is fine but not affecting many. Mesa Elementary, just a stone's throw from Bear Creek has 19-20 in each of its third grade classes. The district needs to do a better job of capping open enrollment numbers at a much lower rate. I cannot follow that the district cares but it's so frustrating that many parents try to "open enroll" into higher ranked schools versus going to their neighborhood schools. It creates way too large of classes, disgruntled educators, and frustrated students.
remycamalier@gmail.com	Parent of a student, resident of an affected neighborhood, student potentially impacted by the changes	I would like to note that this should be a program that is eased in. No child should have to switch schools or afterschool programs due to the new boundary. Start with the incoming kindergarten class. Do not do this to these kids. Its unfair
