Good afternoon Anne Marie,
My name is Carey Jensen, and I am the Director of Facilities for BVSD. I would like to follow up with you regarding your concern about maintenance work that took place in the cafeteria during lunch yesterday. I spoke with the Buildings Supervisor to better understand the scope of work and who was performing it. The task involved removing damaged vinyl tile near the window, where an expansion joint had caused cracking. Prior to beginning the work, the AHERA plan was reviewed to confirm that the tiles did not contain asbestos. The technician assigned to this task is new and still becoming familiar with BVSD procedures, including postponing non-urgent work when students are present, as student safety is our priority. I have addressed this directly with the technician, and they will be more mindful moving forward when completing work in occupied areas. I apologize for the disruption and that this situation led to you picking up your daughter early. We strive to avoid interruptions to the school day whenever possible.

Please feel free to reach out to me directly if you have any additional questions or concerns regarding maintenance activities at BCSIS/High Peaks.

Thank you.
