Gene,

Please see the proposal from Albireo to complete the controls scope for the electric heating coil project at A-7. It sounds like we have some options to reduce scope and associated estimate, so we may need to talk through this at some point.

Thanks,
Dillon

Dillon,

Please find attached Albireo's proposal for the scope of work as detailed by Iconergy for High Peaks. Full transparency on this, a lot of this cost is driven by the added points that Iconergy is requesting, which is requiring the controllers be changed out. If BVSD has some shelf stock of i2 product of i2810's or i2920s, that could help reduce the cost.

There are also other requests that have been made for recommissioning that could also be taken out. Perhaps the desired SoO for the duct heaters could be revised so the added sensors are not required. These measures could also reduce cost.

Sorry, I just wanted to set expectations from go. If you have any questions, please don't hesitate to contact me.
